Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 27-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sturberg (US 5,787,566) in view of Grimhall et al (US 4,516,614). Stursberg discloses a method and apparatus for cutting flat stock comprising a plasma arc cutting head (120, col. 7, lines 35), said head being mounted to move in two directions (col. 8, lines 37-40) to permit said cutting head to cut profiles in a stationary planar workpiece (col. 8, lines 51-59); and a movable bed (8) for supporting a planar workpiece (10); the movable bed (8, col.4, lines 49-55) being movable to a cutting position in which said cutting head (120) is operable to cut the workpiece (10); and the movable bed (8) being operable to transport the workpiece (10) away from the cutting head when cutting of the workpiece (10) has ceased (col. 9, lines 15-18 and col.8, lines 24-26). However, Sturberg does not disclose a path defining a circuit about which said movable bed can move. Grimhall discloses a path defining a circuit about which said movable bed can move (see the figure, col. 2, lines 37-54). It would have been obvious to one having ordinary skill in the art at the time the invention was made to utilize in Sturberg a path defining a circuit about which said movable bed can move as taught by Grimhall in order to run through or re-circulate the workpiece if needed.

3. Claims 1-18 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not show or suggest a cutting machine comprising a pathway including a portion along which said carriage bypasses said cutting head as recited in claims 1-18.

Response to Amendment

5. Applicant's arguments with respect to claim 1-18 and 27-29 have been considered but are moot in view of the new ground(s) of rejection.
6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Anderson (US 6,126,890) discloses in-line material handling system with pallet baskets.
7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quang T Van whose telephone number is 703-306-9162. The examiner can normally be reached on 8:00Am 7:00Pm M-Th.
